

~~SECRET~~/NOFORN - HANDLE VIA SKEET CHANNELS ONLY

22 Dec 88

PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 8819 SESSION NUMBER: 4
DATE OF SESSION: 21 DEC 88 DATE OF REPORT: 22 DEC 88
START: 1504 END: 1545
METHODOLOGY: CRV VIEWER IDENTIFIER: 003

1. (S/NF/SK) MISSION: Describe the general mission of the site and the specific activities/personnel/equipment of each target area.
2. (S/NF/SK) VIEWER TASKING: 003 was instructed to begin the session in Stage 4, after placing the coordinates at the top of the page, and to investigate, in turn, Areas D and E.
3. (S/NF/SK) COMMENTS: None.
4. (S/NF/SK) EVALUATION: []

Area D has dimensional components involving rounded, aligned uniformly-shaped structures that are curving, smooth, and cold to the touch. They are surrounded by a fence-like structure, and nearby are several lattice-like elements. "Electrical," "high tension," "reinforced," and "heavy-duty" are concepts associated with this portion of the site. There is an impression of transformers on rails and large ceramic insulators. Liquids seem to be involved that may be extremely cold (A/S of liquid nitrogen or hydrogen); incorporated with this liquid are the ideas of "inert" and "noble," A/S xenon or freon.

Area E involves in at least one portion a large, long, rectangular, several-floored structure with windows that look out onto a fenced yard with large metal cable spools, and large, massive steel sections stored there. Inside the structure gives the impression of what one might term an electro-mechanical shop. Electrical devices are rebuilt, repaired, or in some cases even fabricated. Windings, copper wire and cable are present. Impression of heavy industry or physical plant here. But other, more intricate work is also performed here on upper levels in smaller rooms. The idea or sense of consolidation of similar activities in one location for efficiency. Impression of a man bent over a work bench with electronic components jumbled up in front of him. Coils, functioning, fields, heavily magnetic, thermocouples, revolving armatures, varying humming and ~~large scale~~ sounds are all involved here.

and large scale
